# Who to See @ IBC

If you are heading to IBC and looking to find top companies specialising in online video products and services, look no further. Here's this year's list of our sponsors that have an exhibition presence amongst the sea of 1,400-plus companies fighting for attention.

Streaming Media magazine will also be at IBC in full force again this year. Visit us at Stand 52 in Magazine Alley (between Halls 7 and 8) to say hello and pick up information on our upcoming conferences: Streaming Media West (Huntington Beach, Calif., 19-20 November) and our newest event, Streaming Forum, which will once again take place in London in 2014.

If you'd like to meet with us, please don't hesitate to email us at [ibc@streamingmedia.com](mailto:ibc@streamingmedia.com).

Enjoy the show!

## IBC Charts the Connected World

IBC's Connected World, situated in Hall 14, will examine the enormous changes being experienced by the whole industry as a consequence of developments in the fields of mobile and IPTV.

Connected World will bring together the latest developments in online, mobile TV, 3G, 4G, and OTT services; second screen applications; and IP technologies. Exhibit stands are combined with a programme of demonstrations and debates

that seek to explain and understand the newly evolving models of creation, management, and delivery of content that are emerging in an increasingly 24/7 connected world.

The Demonstration Area will host a programme of technology and product demonstrations, with topics including apps and software solutions, IPTV/OTT solutions: the connected home and smart devices, video streaming and multimedia networks, and cloud platforms. In addition, Connected Consumer Debates will explore hot topics including the state of the internet, the emerging market opportunity of the connected world, building engagement into programme formats, and content management in the cloud.

This year, IBC's main conference is organised into four streams: Content Creation and Innovation, Advances in Technology, The Business of Broadcasting and Media, and Industry Insights. Seven key themes are threaded through the conference, including From Broadcast to Multicast: Collision, Casualties, and Challenges, which looks at the global impact of convergence on the industry and the challenges for all involved as it adapts to the connected world.

## ADVERTISING & SPONSORSHIPS

**Need Exposure?  
Qualified Leads? More Business?  
LOOK NO FURTHER.**

Streaming Media, an Information Today, Inc. company, is a diversified news media company serving and educating the streaming media industry and community. Originally founded in 1998, the company was sold by Penton Media to Information Today, Inc. in December 2002. Our business consists of three core areas: StreamingMedia.com, exhibitions and conferences, and research and publications. Led by a team of recognized industry experts, Streaming Media is dedicated to providing industry professionals and corporations utilizing digital media technology with global real-time news, resources, and services through editorial, discussion lists, feature articles, webcasts, and much more.

Streaming Media's self-qualified 2013 C- & VP-level purchasing decision-maker audience represents billions of dollars of real annual budget ready to be spent on online-video-related products and services. Regarded as the "filter of the industry," buyers turn to Streaming Media's advertisers as "the trusted brands" to do business within the space.
